## MinnesotaCare Premium Table

July 1, 2012 through June 30, 2013

- These tables approximate the required premium as calculated by the MMIS system. The premium calculation performed by the system is the official calculation and may differ slightly from the approximate premium listed in the table.
- Use the tables to calculate premiums for households with adults only, adults with children who have household income at or below $200 \%$ FPG (in which children have a zero premium), and families with household income above 200\% FPG.
- For example, To approximate the premium for a three-person family (one adult and two children) with household income at or below $200 \%$ FPG, estimate the adult premium as one person covered in a family of three. The children have a zero premium.
- Children with household income over 275\% FPG pay the maximum premium. The maximum premium is $\$ 467$ for one person, $\$ 934$ for two, and $\$ 1,401$ for three or more.

## MinnesotaCare Premium Table

## July 1, 2011 through June 30, 2012

- These tables are intended to approximate the required premium as calculated by the premium calculation program. The premium calculation performed by the system is the official calculation.
- These tables do not adequately deal with cases which include children who have a minimum monthly premium of ${ }^{5} 4$.
- Use the tables to calculate the adult premium for these cases.
- For example, for a three-person family which includes one adult and two children who qualify for ${ }^{\$ 4} 4$ premiums:

1. Use the table to calculate the adult premium.
2. Add ${ }^{\$ 8}$ (a ${ }^{5} 4$ premium for each child).

| *These tables do not adequately deal with cases which include children with a ${ }^{\$} 4$ premium. Use the tables to calculate the adult premium required in these cases. For example, to approximate the premium for a 3 -person family ( 1 adult and 2 children with a ${ }^{\$} 4$ premium), calculate the adult premium and add the ${ }^{\$} 4$ premium per child. |  |  |  |  |
